Nissan e-NV200 ///

Nissan Leaf ///

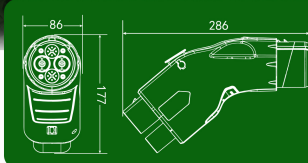

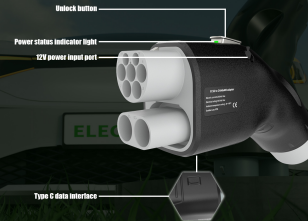

Mitsubishi iMiEV ///

Mitsubishi Outlander ///

## CCS to CHAdMo CHARGING ADAPTER

## How to use the adapter

CCS charging cable

CCS to CHAdMo adapter

CHAdMo standard EV

## User manual

Step1: Insert the adapter into the vehicle charging port the green light is blinking

Step2: Connect the CCS cable to the adapter

Step3: Start the DC charging station

Please follow this process if the green light is off.

1. Connect the 12V to the cigarette light and press the red button on the top (just the car in ignition but don't turn it on). We recommend using a power bank because some of the EV's might not allow you to power the adapter while the car is in ignition
2. You should see the light blinking
3. Insert the adapter into the vehicle
4. Connect the CCS cable to the adapter
5. Start the DC charging station
